Pastor Sandy's 2nd Service Sunday Message Study Notes 02/01/2026

The Real War is Almost Here 5786

Recombinant DNA is “hybrid DNA that has been created from more than one source.”^[i] The basic procedure is where a DNA strand is opened up and then a gene from another organism is inserted making a new strand of DNA. Then the RNA replicates the new strand and it is passed into the entire system. “When recombinant DNA is then further altered or changed to host additional strands of DNA, the molecule formed is referred to as “chimeric” DNA molecule, with reference to the mythological chimera that consisted as a composite of several animals.”^[ii] By means of recombinant DNA, Satan may be able to convince humanity to insert demonic genes, perceived as desirable, into the human genome. The genetic composition of the person, therefore, would result in that person becoming a chimera.

Left Arm: structural gene for a head and a tail.

Central Region: genes for Lysogenic growth and recombination. Insertion of Genome into bacterial genome

Right Arm: genes involved in DNA replication

Plasmid Vector A **vector** refers to any piece of molecule that contains genetic material that can be replicated and expressed when transferred into another cell.

Plasmids are good cloning vectors because they are self replicating, generally small so easy to work with and transform into their host, usually with antibiotic resistance gene(s) to enable selection for transformed hosts, and these days, engineered to have all kinds of useful cloning sites, expression signals and the like.

Recombinant DNA Technology - MyBioSource Learning ...

Gene for Nopaline synthesis (nos) and the **right-hand T-DNA** border sequence are supported by one portion. Recombinant plasmids can be then carefully chosen by growing in presence of spectinomycin, followed by the transitional vectors implantation into Agrobacterium cells possessing the disarmed Ti plasmids.

Recombinant DNA. The technology known as recombinant DNA in fact now makes it possible for a grown man or woman to be altered at the genetic level. If a non-human gene were introduced into the human genome then the person would no longer be fully human but would by definition become a hybrid.

Satan’s long war to destroy the image of God will ultimately fail. Though he will successfully deceive many and even apparently be just moments away from success, the Lord will in the end intervene. More than likely victory will appear to be just on the verge of achieving – very much like how it was in the days of Noah. Every human on the planet, except Noah and his family, were corrupted morally and perhaps also genetically as well. With only eight standing in the way, Satan must have felt that victory was his – only to watch his entire devilish work gasp for air and then perish in the flood.

How many **chromosomes** do humans have? Humans **have 23 pairs of chromosomes**, for a total of **46 chromosomes**.

In the month of January 2003 God placed before me a count of 6000 years of the bible. The count began like this. **Genese 1:1** **Began Tisheri 1** the beginning of the first year

2017 = 6000 = 120 Jubilees Years Count = 5778

6000 ÷ 27 =	
222.222222222222	
6000 ÷ 28 =	
214.2857142857143	
6000 - 222 = 5778	6000 - 214 = 5786
